**SCIENCE CHANNEL'S *BUILD IT BIGGER* TOURS THE GLOBE IN SEARCH
OF ENGINEERING PROJECTS THAT ARE CHANGING LIVES**

-- Season Four Premieres Thursday, April 8, 2009, at 9 PM (ET/PT) --

(Silver Spring, Md.) – Back for a fourth season, host Danny Forster traverses the globe examining jaw-dropping and life-altering feats of engineering in the Science Channel fan-favorite series **BUILD IT BIGGER, premiering Thursday, April 8 at 9 PM ET/PT.**

Forster, a Harvard trained professional architect, brings viewers inside the planet's most astounding and innovative engineering projects. From the largest cantilever on earth hanging 650 feet above Singapore to rerouting 16 miles of river to construct the world's most powerful hydroelectric plant outside Rio de Janeiro to New Orleans's new, two-mile storm surge barrier, each project not only changes the city's infrastructure dramatically but also improves life for the city's inhabitants.

In each episode, Forster lifts the veil on innovative architecture and engineering at the largest, most impressive job sites in the world. He is there with unprecedented insight when San Francisco's Bay Bridge undergoes a six billion dollar earthquake proofing project, when a 35 mile tunnel is built under the Swiss Alps, or when the Port of Rotterdam in the Netherlands continues the most ambitious land reclamation project in history.

This season, **BUILD IT BIGGER** will feature: the Singapore Sky Park; the Al Hamra Tower in Kuwait; New Orleans Storm Surge Barrier; Rio de Janeiro's Power Island project; South Africa's Mponeng gold mine; San Francisco's Bay Bridge reconstruction; the new Melbourne Stadium; Gothard Base Tunnel; Port of Rotterdam's Expansion and Abu Dhabi's Central Market.

BUILD IT BIGGER airs weekly on Thursdays night at 9 PM (ET/PT) on Science Channel.

BUILD IT BIGGER is produced for Science Channel by Powderhouse Productions. Joel Olicker and Dan Miller are executive producers for Powderhouse. Christo Doyle is the executive producer for Science Channel. Deborah Adler Myers is general manager of the Science Channel.

About Science Channel

Science Channel, a division of Discovery Communications, Inc. (Nasdaq: DISCA, DISCB, DISCK), is broadcast 24 hours a day and seven days a week to 66 million U.S. homes and simulcast on Science Channel HD. We immerse viewers in the incredible possibilities of science, from string theory and futuristic cities to accidental discoveries and outrageous inventions. We take things apart, peer inside and put things together in new and unexpected ways. We celebrate the trials, errors and brinking moments that change our lives forever. To find out more go to sciencechannel.com.
