DISCOVERY CHANNEL'S *CURIOSITY* SERIES RETURNS IN OCTOBER

– Season Narrated by Actor Josh Charles –

(Los Angeles, Ca.) – Last fall, the Discovery Channel introduced viewers to an unprecedented new series that brought the 'I wonder?' moment to television with a unique array of provocative subjects. We explored Atlantis, the sinking of the Titanic, and fourteen other puzzling mysteries.

This October, **CURIOSITY** is back with new episodes, which Discovery is pleased to announce will be narrated by actor Josh Charles. The series will continue to look to answer some of the most iconic and enduring mysteries of science. What *actually* happens to a plane when it crashes? How is a mummy made? Why do people seemingly vanish into thin air in the Bermuda Triangle? What does Yellowstone look like from under the surface? And how was Stonehenge actually built? All of these questions and more will be explored in the new season of **CURIOSITY** beginning in October.

Featured topics in the upcoming season of **CURIOSITY**:

- ***Plane Crash***: In this groundbreaking experiment, scientists recreate a serious (but survivable) passenger jet crash landing in order to allow experts to study the crashworthiness of the aircraft as well as the impact of crashes on the human body.
- ***Mummy***: In this radical experiment, a dying man gifts his body to scientists attempting to uncover the secrets of Ancient Egypt's best embalmers.
- ***Bermuda Triangle***: Scientists dive into the fabled triangle, analyzing its wrecks and testing different theories on real boats and planes in order to reveal the truth behind the legend.
- ***Yellowstone***: Scientists use the latest imaging technology to pierce the surface of our most iconic national park and see its habitat and ecosystem from the inside out.
- ***Stonehenge***: How did the inhabitants move ninety multi-ton stones two hundred miles across land and sea to the ancient stone circle that has stood for over 4500 years?

About Discovery Channel

Discovery Channel is dedicated to creating the highest quality non-fiction content that informs and entertains its consumers about the world in all its wonder, diversity and amazement.
