

ANIMAL PLANET

Surprisingly Human

FREAKY FRIDAYS

**IN OCTOBER, FRIDAYS WILL FRIGHTEN YOU!
MONSTERS INSIDE ME SWITCHES TO FRIDAYS, at 9PM**

Beginning October 11, at 9 PM (ET/PT), BEWARE of the *deadly* parasites, viruses and bacteria that'll make your skin creep and crawl when Animal Planet's **MONSTERS INSIDE ME** moves to Fridays this hallowed month.

Nothing's more insidiously evil than the killers you can't see... This October, watch in horror as nine innocent individuals confront near-death experiences, life-altering decisions and *gruesome* diagnoses. Below are some of the terrifying, true tales you'd better see to believe:

- A fiancé is faced with a horrific decision of life or limb when her husband collapses into extreme sickness.
- Can a vulnerable eight year old stand up to a monstrous attack, or does she face a life-threatening paralysis?
- A teenager is crippled with intolerable muscle failure and merciless pain. Can doctors free her from this spine-chilling distress?
- Is it a hallucination, or is something really CRAWLING through a young man's eye?!
- A mother's nightmare becomes startlingly real when her small child's sickness transforms into a horrifying parasite.
- Straight from the pages of a shocking horror tale, a former beauty queen begins oozing green phlegm. What's causing this repulsive discharge, and can doctors make it stop?

Fridays in October are sure to freak you out!
