SCIENCE CHANNEL RENEWS
SCI FI SCIENCE AND METEORITE MEN FOR SECOND SEASONS

(Silver Spring, Md.) – Science Channel General Manager and Executive Vice President of Programming Debbie Myers announced the renewal of two freshman smash hit series, **SCI FI SCIENCE: PHYSICS OF THE IMPOSSIBLE** featuring Dr. Michio Kaku, and **METEORITE MEN** with Geoff Notkin and Steve Arnold, for second seasons. Both are scheduled to premiere this fall on Science Channel.

“Both these series are great Science Channel fan favorites. Michio is the rock star of the science world as a frequent commentator on topics ranging from the Gulf oil spill to the Icelandic volcano,” said Myers. “And Geoff and Steve are true rock stars, using their passion and geology to bring us ever closer to worlds that lie beyond our own.”

In season two of **SCI FI SCIENCE**, produced by ITV Studios, Dr. Michio Kaku reaches further into the fantastic world of science fiction to explore what one day might very well be our reality. Season two offers viewers a wealth of exclusive insight into various sci-fi topics, including how to defend yourself against an alien attack, how to travel in hyperspace, how to build a shape-shifting transformer, how to protect Earth from a massive asteroid, how to build a starfighter and more.

Produced by LMNO Cable Group, season two of **METEORITE MEN** goes international as hosts Geoff Notkin and Steve Arnold take their high-tech hunt for alien treasures to Africa, Australia and even an underwater search in Greenland. Using the latest in metal detection, they search rugged terrain and battle extreme weather to unearth space rocks invaluable to science and worth thousands on the market. The odd couple of the meteorite world (one is British and one is American; one is a vegetarian and the other a devoted carnivore), Geoff

and Steve meet almost exclusively at their love for meteorite hunting. It's their shared passion for 4.5 billion-year-old pieces of outer space that has sent the team to all corners of the globe for nearly 13 years.

SCI FI SCIENCE: PHYSICS OF THE IMPOSSIBLE is produced for Science Channel by ITV Studios. Liz McLeod is executive producer and Fred Hepburn is series producer for ITV Studios. Tim Pastore is executive producer for Science Channel.

METEORITE MEN is produced for Science Channel by LMNO Cable Group. Eric Schotz is executive producer and Craig Borders is co-executive producer for LMNO Cable Group. Christo Doyle is executive producer for Science Channel.

About Science Channel

Science Channel, a division of Discovery Communications, Inc. (Nasdaq: DISCA, DISCB, DISCK), is broadcast 24 hours a day and seven days a week to more than 66 million U.S. homes and simulcast on Science Channel HD. We immerse viewers in the incredible possibilities of science, from string theory and futuristic cities to accidental discoveries and outrageous inventions. We take things apart, peer inside and put things together in new and unexpected ways. We celebrate the trials, errors and brinking moments that change our lives forever.
